LA CAMPANELLA ALTO 2 MARK II

LA CAMPANELLA ALTO 2 MK II

The **LaCampanella Alto 2 MK II** has now found its place within the Acapella family. With the introduction of our new hyperspherical horn technology, it brings an even greater sense of playfulness, vitality, and dynamic freedom into every listening room.

It combines a graceful, sculptural presence with precise and highly expressive musical reproduction. Its sound is defined by clarity, poise, and a surprisingly powerful low end that remains controlled and deeply musical despite the speaker's slender silhouette. The result is a perfectly balanced instrument for listeners of every genre and every mood. It does not merely follow the music — it knows the direction before the first note has fully settled, and it arrives with confidence.

At the heart of its performance lies the hyperspherical horn, which extends across a full four octaves instead of the three typically associated with horn systems. This allows the entire midrange and treble spectrum to flow with remarkable ease, speed, and precision. In the bass, eight drivers work together in intelligent synchrony, behaving as though they were one large, unified transducer. The cylindrical wave that the Alto produces in the lower frequency range not only ensures a more precise bass, but also enables easier integration into more complex listening environments.

The MK II version has become even faster and more precise on every level than its award-winning predecessor. In addition to the optimized horn and the further reinforced bass enclosures, the MK II now features a crossover equipped with Hypersphere technology.

With the Alto 2 MK II, we have reinterpreted the legendary LaCampanella 2 for a contemporary moment. The result is a modern statement piece that translates electrical impulses into musical experience with authority, elegance, and unmistakable character.

All Acapella Audio Arts loudspeakers are individually crafted in Germany. Therefore, we can offer almost all available automotive paint colors for the horns and acrylic colors for the cabinets, as well as minor adjustments to the overall height at no additional cost, if required.

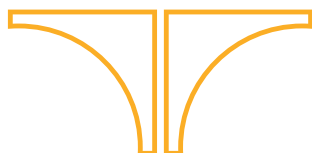

LA CAMPANELLA 2 MARK II

BASE MODEL

TECHNICAL DATA

Woofer	8x 6,5 inch driver
Tweeter	1" driver, hyperspherical horn 420 mm
Total frequency range	25 Hz - 25 kHz
Efficiency	96dB / 1W / 1m
Impedance	4 Ohm
Dimensions (without Horn & base)	2260 x 265 x 530 mm
Dimensions (with Horn & base)	2260 x 450 x 705 mm
Weight	Approx. 155 kg
Price	On request
